

Close Interval Survey

Paramount Pipeline LLC
14700 Downey Ave, Suite 100
Paramount, CA 90723
562-748-4751

Dear Landowner,

Paramount Pipeline LLC (PPL) operates a pipeline system that crosses your property. The purpose of this letter is to inform you of upcoming activity on the right of way. PPL will be conducting a Close Interval Survey as part of the continued monitoring and maintenance of this pipeline.

PPL, along with its contractor, will be conducting a Close Interval Survey to assess the effectiveness of the cathodic protection system and as well as to comply with government regulations. The study will involve a three-person crew walking the entire pipeline route. To ensure the effectiveness of this cathodic protection system, a varnished coated copper wire attached to a test station is spooled along the pipeline behind an individual that will collect the data. A second individual will retrieve the wire. A third individual is used to locate the pipeline. The study will not require any digging and will not otherwise result in any damage to your property.

PPL plans on beginning the Close Interval Survey the week of _____ and completing the survey the week of _____. However, this timetable is subject to delay depending on the weather and other unexpected outside influences. Please contact tenants or lessees who may rent the land to advise them of PPL's upcoming survey.

PPL takes great pride in the relationships we have built on trust with our many landowners and communities in which we live and work. It is our goal to maintain good relations with all our neighbors, working with them in a fair and responsive manner. Please email PPL at Jewart@worldenergy.net or call 1-562-748-4751 if you have any questions or concerns. If you have received this communication by mistake or your address has changed, please let us know so we can update our records accordingly.

Sincerely,

Jeffrey Ewart, P.E.
Manager, Pipeline Compliance
